

Distal Clavicle Fracture? We Have Your Solution.

More Options

Acumed offers **three different distal screw cluster options** to address varied fracture patterns.

Unicortical Fixation

The Acu-Sinch® Repair System penetrates only the superior cortex of the coracoid, **preserving the inferior cortex and protecting the neurovascular structures below.**

Diverging & Converging Screws

Superior distal plates offer up to **eight 2.3 mm diverging screws** and are designed for the maximum amount of bone purchase and pullout resistance.
